SHRM-SCP and CSP certified

What's Really Important to Erika!

Most Employees Don't Recall Their Safety Training

- Nearly one-third of the nonfatal occupational injuries or illnesses that involved time away from work were suffered by workers with less than one year of service.
 - US Bureau of Labor Statistics
- Nearly one-quarter of these cases resulted in 31 or more days away from work.
 - Ken Kolosh, National Safety Council
- 80 percent of workers who were in their first year of employment could not remember receiving any workplace safety or orientation training.
 - Peter Smith, IWH

*Institute for Worker's Health

Hand & finger lacerations

First 90 Day Injuries

Upper arm and lower back strains

Slip, Trip and Fall injuries

Knowing this, what needs to be done differently?

Basic Means Basic!

A large construction project got off to a rough start with three first aid cases in the first two days of work.

The injured employees had one thing in common:

They did not know their foreman's last name or how to contact them.

Project leadership called a safety stand-down and crews completed a series of team building exercises.

The remainder of be project was injury-free

The First 90 Days Are Critical For Employees

Three questions employees ask in the first 90 days:

- Can I do this job? Role clarity and expectations
- Do I belong: Social integration and support
- Can I thrive: Feedback and development

Addressing these needs lead to higher engagement, improved performance, and increased retention of new employees.

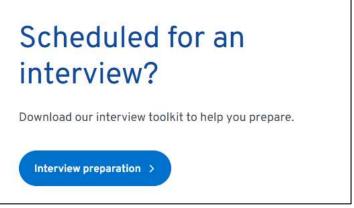

Setting the stage for the entire employment relationship

Start Before They Start!

Does your website give recruits a sense of job hazards?

Inject Safety Into the Hiring Process

Example: A large construction project produced videos shot with go pro cameras mounted on hard hats to give new employees a preview of the job site and key hazards

What Do Workers Say About Their First Day?

What Should They Say?

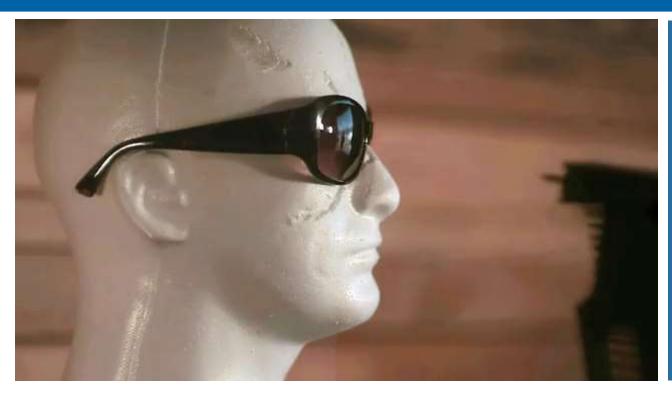

The Power Of Moments by Chip and Dan Heath

The leadership team at a commercial bakery planned "touch points" with new employees - specific opportunities to engage and influence teammates in their first 90 days.

In addition to the usual orientations and presentations, new employees found a personal, handwritten note from their manager when they first arrived."

Unlocking the Power of Emotion!

How well does this slide convey...

...The logical (minds)?

...The emotional (hearts)?
